

## Práctica

### 1

Medical Provider: You said earlier that you want some information for your child.

Mother: Yes, my child is 17 years-old, and they are a non-binary person. They have diabetes and we are looking for a doctor who would have experience working with the LGBTQ community. Do you know anybody?

Medical Provider: My colleague at a hospital in Springfield is a great nurse practitioner and she is taking new patients. The receptionist can make the appointment

Mother: I will have to check with them first. With my child, I mean. Thank you so much.

### 2

Juan: ¿Conoces a María?

Luisa: Si, elle y yo hemos sido amigues desde que estábamos en escuela elemental. Es súper chévere, inteligente y buene.

Juan: ¿Por qué dices elle si se llama María?

Luisa: Porque ese es el pronombre de María. Lo oí directamente de elle. No me lo estoy inventando.

Juan: Gracias por decírmelo porque creo que he estado usando el pronombre que no es.

### 3

Tuti: My partner and I are looking for a program for queer folks. We are trying to meet other young people.

Educador en Salud: ¿Qué tipo de programa les interesa a ti y a tu pareja? ¿Cómo se llama tu pareja?

Tuti: Their name is Chris. We want something to socialize, meet people, play games, hang out. We don't want any counseling or anything like that.

Educador en Salud: Hay un programa nuevo en la ciudad. ¿Tu pareja habla español o inglés?

Tuti: They are American, but they speak both English and Spanish.
